

AMAN SONI

AI Engineer · Backend Systems · LLM Integration

Ghaziabad, India (Remote) · +91 8527100401 · amansoni4144@gmail.com · github.com/AmanSoni1-apex · reflecta-seven.vercel.app

PROFILE

AI Engineer and backend developer with hands-on experience building and deploying production LLM-powered systems. Designed and shipped Reflecta — a live, cloud-deployed cognitive AI app — integrating large language models, FastAPI, and JWT-secured multi-user backends. Comfortable working across the full backend stack: API design, database architecture, AI pipeline integration, and cloud deployment. Actively seeking a remote AI engineering role at a fast-moving startup where I can ship meaningful product from day one.

PROJECTS

Reflecta — AI Cognitive Journal System · 2024 – Present

Stack: Python · FastAPI · Gemma-3 (via Ollama)/google-Gemini · JWT · Supabase · Vercel [[Live App](#) | [GitHub](#)]

- **Built & deployed a production LLM system:** Architected an end-to-end LLM pipeline using Gemma-3 to analyze emotional sentiment from free-form user text — from raw input to structured AI-generated insight.
- **Engineered secure multi-user architecture:** Designed a secure multi-user backend using FastAPI and the Repository Pattern, enforcing strict per-user data isolation to prevent cross-user data leakage in a shared database.
- **Implemented auth pipeline:** Integrated JWT-based authentication with protected route middleware — all AI endpoints gated behind verified sessions.
- **Shipped to production:** Deployed full-stack app to Vercel with Supabase cloud DB; live and publicly accessible.
- **LLM abstraction layer:** Built OpenRouter API integration layer to enable model-switching without code changes (Gemini Flash, Gemma-3).

Digital Virtual Hotel Card System — Backend Lead · 2025

Stack: Java · Spring Boot · REST APIs · QR Code Generation · Security Protocols

- **Led backend architecture:** Architected an enterprise-grade hospitality backend replacing physical access cards with digital, session-based virtual keys.
- **Engineered access control system:** Built a QR code generation and validation engine managing the full lifecycle of guest access — issuance, activation, suspension, and expiry.
- **Security optimization:** Optimized backend validation protocols for card state management, improving security response accuracy by 30%.

LEADERSHIP

Full-Stack Development Workshop — Student Head · 2025

- Coordinated a 150+ student cohort across a multi-week full-stack development boot-camp, liaising between industry trainers and academic participants.
- Managed end-to-end workshop logistics and mentorship, achieving a 100% project completion rate across all participants.

TECHNICAL SKILLS

AI / LLM: LLM integration (Gemma-3, Gemini Flash), OpenRouter API, Ollama, prompt engineering, sentiment analysis pipelines

Backend: Python (FastAPI), Java (Spring Boot), REST API design, JWT authentication.

Databases: Supabase (PostgreSQL)

DevOps & Cloud: Vercel deployment, Supabase cloud DB, Git.

Tools: Postman, GitHub.

Languages: Hindi (Native) · English

E D U C A T I O N

Master of Computer Applications (MCA) · *Expected 2026*

INMANTEC Institutions (AKTU) — Ghaziabad, UP · Aggregate: 76.0%

Bachelor of Computer Applications (BCA) · *2021 – 2024*

Sunder Deep Group of Institutions (CCSU) — Ghaziabad, UP · Aggregate: 69.94%

Honors: Ranked #1 among all BCA students for technical leadership and project excellence.
