

AMAN SONI

Gen AI Engineer

Ghaziabad, India (Remote) · +91 8527100401 · amansoni4144@gmail.com

Github :- github.com/AmanSoni1-apex

Portfolio :- portfolio-seven-eta-34.vercel.app

PROFILE

Gen AI Engineer and backend developer with hands-on experience building and deploying production LLM-powered systems.

Shipped two live products :-

Reflecta - cognitive AI journaling app with Gemini 2.0 Flash, FastAPI, Supabase, JWT auth.

BuildThis - AI architecture blueprint generator; takes messy problem descriptions and generates complete technical blueprints using LangChain, Groq, 26+ Actual problems, 10+ user.

Full-stack capabilities: FastAPI backends, LangChain/LLM orchestration, Supabase databases, Vercel deployment, JWT authentication, API integration.

PROJECTS

BuildThis — AI-Powered Idea Validator & Project Planner · 2026 – Present

Stack: Python · FastAPI · LangChain · Groq (llama-3.3-70b) · Next.js · Supabase · Vercel · [buildthis-frontendy.vercel.app]

- **Orchestrated a two-stage LLM agent pipeline:** Built an AI Refiner agent (LangChain + Groq) that restructures and refines vague user input into a scoped problem statement, then passes it to an AI Architect agent that generates a complete technical blueprint stack, API design, DB schema, cost estimate, and MVP roadmap in a single request.
- **Eliminated unstructured LLM output as a failure mode:** Enforced strict JSON output schemas at each agent stage ensuring the Architect's blueprint (features, API routes, DB relationships, difficulty, cost, timeline) is always parseable and consistently renderable by the Next.js frontend, regardless of model variance.
- **Shipped a complete product solo from idea to live users:** Independently designed and deployed the full system FastAPI backend, LangChain AI layer, Supabase (PostgreSQL) persistence for problem + blueprint storage, and a Next.js/TypeScript frontend with real end-to-end flows working in production.

Reflecta — AI Cognitive Journal System · 2026

Stack: Python · FastAPI · Gemma-3 (via Ollama)/google-Gemini · JWT · Supabase · Vercel · [reflecta-seven.vercel.app]

- **Designed a modular LLM provider abstraction:** Built an OpenRouter integration layer decoupling AI logic from model-specific dependencies, enabling runtime switching between Gemini Flash and Gemma-3 (via Ollama) without touching application code.
- **Enforced user-level data isolation across a shared cloud database:** Implemented the Repository Pattern in the data access layer (Controller → Service → Repository → Model) with JWT-gated routes.
- **Built a cognitive AI pipeline for unstructured human input:** Engineered the Service layer to process raw, fragmented user thoughts through an LLM — detecting emotional tone, generating reflective summaries, and tracking sentiment patterns over time with structured error handling to maintain pipeline reliability during model failures.
- **Eliminated perceived latency in AI responses:** Integrated streaming response delivery via OpenRouter so users receive progressive AI output in real time — removing the full-completion wait that degrades UX in journaling flows.

LEADERSHIP

Full-Stack Development Workshop — Student Head · 2024

- Coordinated a 170+ student cohort across a single week full-stack development boot-camp, liaising between industry trainers and academic participants.
- Managed end-to-end workshop achieving a 100% project completion rate across all participants.

TECHNICAL SKILLS

AI / LLM: LLM integration (Gemma-3, Gemini Flash, Llama-3.3-70b), LangChain, OpenRouter, Groq .

Backend: Python (FastAPI), REST API design .

Databases: Supabase (PostgreSQL)

DevOps & Cloud: Vercel deployment, Supabase cloud DB, Git.

Tools: Postman, GitHub.

Languages: Hindi (Native) · English

EDUCATION

Master of Computer Applications (MCA) · Expected 2026

INMANTEC Institutions (AKTU) — Ghaziabad, UP · Aggregate: 76.0%

Bachelor of Computer Applications (BCA) · 2021 – 2024

Sunder Deep Group of Institutions (CCSU) — Ghaziabad, UP · Aggregate: 69.94%

Honors: Ranked #1 among all BCA students for technical leadership and project excellence.
